# Muntafid Islam Nafsi

Dhaka, Bangladesh | +880 1607-046057 | muntafid.islam@gmail.com | linkedin.com/in/muntafid-islam-nafsi | github.com/nafus08

## Summary

Computer Science student with hands-on full-stack experience in React, Next.js, Node.js, and PostgreSQL, plus Android (Kotlin) and machine learning projects. Solid foundation in data structures, algorithms, and database design, with experience building and shipping a complete web application in a team.

## Education

**BRAC University** Jan 2024 – Present
*BSc in Computer Science* ***(CGPA: 2.92/4.00)*** *Dhaka, Bangladesh*

- **Relevant Coursework:** Data Structures, Algorithm Analysis, Database Design, Computing Mathematics, Full Stack Development, Object-Oriented Design, Java, Python, Artificial Intelligence

## Experience

**Full-Stack Developer (Intern)** May 2026 – Jun 2026
*Fast Trim International* *Dhaka, Bangladesh*

- Built a full-featured garments website from scratch in a team of 2 using **React, Next.js, Tailwind CSS, Express.js, and PostgreSQL**, including product listings and a user login system
- Implemented end-to-end functionality across frontend and backend, with a responsive UI that works across devices

**Executive** Feb 2026 – Present
*BRAC University Entrepreneurship Development Forum (BUEDF)* *Dhaka, Bangladesh*

- Designed promotional graphics and social media posts for club events and coordinated logistics for large-scale university events

## Projects

**School Management System** | *Node.js, TypeScript, MySQL* GitHub

- Built a full-stack system with a responsive TypeScript front end, dynamic routing, and form validation for student, teacher, and admin roles
- Designed the MySQL schema and queried it directly from Node.js to manage student records, attendance, and grades

**UsedCarParts** | *Kotlin, Gradle, Firebase* GitHub

- Built an Android marketplace app for buying and selling used car parts, using Firebase for authentication, database, and storage
- Designed the ERD and wireframes before development and added Arabic and Right-to-Left (RTL) layout support
- Implemented listings, user accounts, and real-time data sync end to end

**Customer Churn Prediction** | *Python, Neural Network, KNN, Logistic Regression* GitHub

- Implemented Neural Network, K-Nearest Neighbors, and Logistic Regression classifiers from scratch and compared their performance on a dataset
- Preprocessed data, tuned hyperparameters, evaluated models using accuracy and other metrics, and documented findings in a project report

## Technical Skills

**Languages**: Python, Java, TypeScript, Kotlin, SQL, HTML/CSS
**Frameworks & Libraries**: React, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap
**Databases**: PostgreSQL, MySQL, SQLite, Firebase
**Tools**: Git, GitHub, Gradle, Jupyter Notebook

## Extracurricular

Co-Founder, Jagroto Foundation (charity NGO, 2021) | Volunteer, RYZE AI Camp, BRAC University (2026)
