Backend: Node.js, Express.js, Python, Java, Kotlin
Databases & Tools: PostgreSQL, MySQL, SQLite, Firebase, Prisma, Supabase, Git & GitHub, Gradle, Jupyter
AI & APIs: LLM API integration, webhooks, prompt design, output validation, ML basics
Interpersonal: Teamwork, communication, event coordination, problem solving

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern | Fast Trim International, Dhaka May 2026 - Jun 2026

- Built a full-featured garments website from scratch in a two-person team using React, Next.js, Tailwind CSS, Express.js and PostgreSQL.
- Implemented product listings and a user login system across frontend and backend.
- Delivered a responsive interface that works across all devices.

PROJECTS

Customer Churn Prediction (Python, Neural Network, KNN) GitHub

Machine learning project that predicts which customers are likely to leave, and compares three classification approaches on the same data.

- Trains a neural network, K-nearest neighbors and logistic regression classifier.
- Evaluates and compares all three models using ROC-based metrics.
- Built in Python and Jupyter as a course project for Artificial Intelligence.

School Management System (Next.js, TypeScript, Prisma, PostgreSQL) GitHub

Full-stack web app for running school operations, with separate access for different school roles.

- Manages student records in one place.
- Tracks daily attendance.
- Records and displays student grades.
- Supports multiple school roles.

UsedCarParts (Kotlin, Firebase, Gradle) GitHub

Android marketplace for buying and selling used car parts.

- User accounts and authentication.
- Create and browse part listings.
- Real-time data sync across devices.
